HEALTHMART NETWORK + WELLNESSTOYOU.US

PITTSBURGH, OCTOBER 3, 2008—Pathways to SmartCare is partnering with the first web based directory of mobile wellness providers, WellnessToYou.us. This online directory focuses on bringing "Healthcare delivered to your doorstep."

The site caters to consumers who are looking for wellness providers that will travel to their home, office or community center so they may gain the benefits of a healthy lifestyle while being able to fit these activities into their own schedules.

Site-users can search for providers by inputting their zip code and selecting a certain radius. The user can search for specific provider types or view the whole database according to their zip code.

HealthMart and WellnessToYou.us will work together to develop the database so the site will become beneficial for consumers and providers nationwide. To do this, HealthMart is offering its provider members 20% off the annual membership cost of WellnessToYou.us.

Conversely, current and new providers that belong to WellnessToYou.us have to opportunity to join HealthMart at 20% discount as well.

This is great news for health and wellness providers. The nature of the wellness industry is such that the success of a health and wellness based business often depends on a good standing reputation and experience. Your acceptance into the HealthMart network verifies that you are educated, legally able to do business in your field, and experienced.

By partnering with WellnessToYou.us, HealthMart has broadened the range of opportunity to gain more clientele and work-related experience.
